

STUDENTS FROM MIDDLETON EDUCATE TOGETHER N.S. EXPLORE SCIENCE WITH A LITTLE HELP FROM GE HEALTHCARE

Duggan employees from GE Healthcare, Carri-geonagh, volunteered to take part in this initiative and gave the students a great insight into what it is like to work in a science environment. The event featured a range of activities, including solving mysteries using forensic science, examining the properties of light and building their very own periscope.

Shelly O'Flynn, 6th class teacher said, "The students really enjoyed the programme. The lessons were interactive, informative and great fun. We are grateful to the volunteers from GE Healthcare for their guidance and enthusiasm."

6th Class students from Middleton Educate Together.

The programme is with almost 5000 6th class students taking part. It aims to introduce the students to the world of science, the role it plays in industry and provides information on

STEM skills. The programme is taught by trained business volunteers from a wide range of local supporting companies.

Reyes Hevia and Ita

Students from 6^h class in Middleton Educate Together National School recently participated in the Our Universe programme in their school. This innovation sci-
